# If you want to know which computer to buy, ask your expert.

You knew it would happen some day. Some day, your child would become smarter than you.

What you didn't expect was that it would happen so soon. To you, computers are a mystery from the future.

But to your children, they are a real source of excitement. And they're happening now.

## THE FIRST FAMILY COMPUTER.

So what will this young expert say when you ask which computer to buy? First, make sure that you have sufficient power for your needs. That your computer is easy to learn, and easy to use. And that it has a challenging, entertaining and expanding range of software.

The Dragon 32 is the first computer specifically designed for the family. And as such, we feel that it meets even our young expert's stringent criteria.

The Dragon offers a truly massive 32K RAM memory – harnessed by the advanced 6809E microprocessor. This is quite simply more than you're ever likely to need – but it does mean that your computer's capabilities can respond to your increasing ability as you learn your way around.

And how quickly you'll learn. The Dragon's easy-to-follow instruction manual helps. But what will really get you going is the fact that you'll be enjoying every minute.

And when it comes to ease of use, the Dragon's professional-quality keyboard makes your computer as familiar as a typewriter.

## SOFTWARE TO MATCH.

Dragon software offers a great range of games – but that's not all. You'll find educational programs. Programs to help you plan your money. Even programs which teach you how to program.

And whether you're playing or working, you'll be learning more and more about this increasingly important new technology.

The Dragon 32 costs just £175.00.* For that, you get all the features that your child could ask for - which means just one thing. It's a very grown-up computer indeed.

*T.V. not included in price.
