# THE KET TRILOGY

BY JOHN MARTIN AND RICHARD MCCORMACK

## ❖ THE KET TRILOGY – THE CELEBRATED ADVENTURE CLASSIC ❖

### THE STORY SO FAR...

The Lords of Ket rule a sterile, torn land where magic and mayhem are commonplace. Raiders from the east sweep in and devastate the countryside, spurred by the villainous Priest-King Vran'leusbel, arch-mage of the cult of mudmonks and by the beautiful, though utterly evil, Pierious Delphia.

Unjustly condemned for a murder you did not commit, you have been offered the chance of escaping the hangman's noose by undertaking a perilous quest. Naturally you accept, but to ensure your loyalty to the cause, the Lords have placed a magic assassin bug on your neck, ordered to sink his poisonous fangs into you at the slightest sign of cowardice.

Posed at the brink of the unknown village, you stand alone with the daunting mission before you. With just a handful of coins, your trusty sword and the will to succeed...

Your task is to travel beyond the mountains and then underground via Vran's temple to the ultimate confrontation with Vran himself, penetrating his inner sanctum, beyond the Guardians of the Gates...

THE THREE BOOK ADVENTURES  
TOGETHER FORMING THE  
CLASSIC AND COLOSSAL  
KET TRILOGY

## How to submit articles

The quality of the material we can publish in Dragon User each month will, to a very great extent, depend on the quality of the documents that you can make with your Dragon. The Dragon computer was launched on to the market with a powerful version of Basic, but with very poor documentation.

Articles which are submitted to Dragon User for publication should not be more than 3000 words long. All submissions should be typed. Please leave wide margins and a double space between each line. Programs should, wherever possible, be computer printed on plain white paper and be accompanied by a tape of the program.

We cannot guarantee to return every submitted article or program, so please keep a copy. If you want to have your program returned you must include a stamped, addressed envelope.

# Contents

## Letters

4

American cousins, writer writes, National Usen Group, and more

## News

7

Repairs and add-ons from Race and Compensense, Dragon 128K, Adventurer's Club, North Eastern BBS, and communications from Commodore Computers

## Adventure Classics

9

Jason Ortaum with a look at some of the great — and not so great — adventures for your Dragon

## Windows

12

Brian Cadge with a program which lets you put windows in your programs — great for adventure writers

## Dragbase

19

Ever wanted to put all your names and addresses on a database? Lee Profile shows you how you can

Cover by Oliver Frey, courtesy Incentive Software

## Manic-Miner cheats

23

Roy Cades, the programmer who converted Manic-Miner for the Dragon, with the authorised cheats — plus a tip on how to put machine code right where you want it

## More Than

25

Rob Lee teaches you how to turn the Dragon into an educational tool with this simple mathematics program

## Adventure Trail

28

This month, Mike Gerrard takes a long look at Incentive Software's *Art Trilogy* — plus hints and tips on other adventures

## Dragon Answers

31

Brian Cadge, the Dragon's doctor, with another of his monthly doses of timely medicine

## Competition Corner

34

This month's competition looks like Gordon Lee got it all backwards — but if you can sort out the answer, you can win one of 20 copies of Design Design's *Amoral's Revenge*

# Editorial

THE NEWS that Compensense has taken delivery of a 128K Dragon prototype may not cause much of a ripple outside Dragon circles.

But a Dragon 128K is far more than just an indication of how far computers, like clothes, follow the dictates of fashion.

For one thing it shows that something can be done with the Dragon — there is life after the 64.

Those readers who managed to catch a glimpse of Eurohard's Dragon 200 at the last 6809 show will remember that there seemed little to write home about at the time.

The case may have been restyled, but the keyboard was the same. So were all the internal workings — it was just a 64 in a new box. The only real difference is the addition of an LED to show when the computer is turned on.

But it now turns out that the 64's RAM chip could accommodate 128K of memory all along. So why hasn't Eurohard managed to put the extra chips in?

Let's face it, given the choice between a stylish case and a little red light on the one hand, and an extra 64K of memory on the other what would most Dragon users choose?

Another thing the 128K prototype proves is that Compensense at least is willing to show some commitment to the continued development of the Dragon.

On the software front, companies like Microdeal, Adventure International, Dilecom and many others are also still supporting the Dragon — although most of the games being released at the moment are conversions of titles for other machines.

But the majority of the support, which is responsible for the continued existence of the Dragon doesn't come from any of these companies — it comes from ordinary Dragon users. With all of its faults, the 6809 has thousands of loyal supporters.

Without the sort of commitment Dragon users have been showing over the last 12 months, there is no doubt that the machine would have been relegated to the museum like the Oric, the Lynx and others.

# Letters

This is the chance to air your views — send your tips, compliments and complaints to Letters Page, Dragon User, 13-15 Little Newport Street, London WC2H 9PP.

## Write on

WITH REFERENCE to my "Writer" program published in May's *Dragon User*, readers may be interested to know that I can supply copies of listings 1 and 2 on a single cassette at £5.95 including postage and packing.

Please write to me at the address below, and not at the one contained in the listing.

Phil Brooks  
1 Alcedon Close  
Goswilly  
Northants

## and on

MAY I congratulate Phil Brooks on his excellent "Writer" extension interpreter program.

It is a pity that the manufacturers did not include a similar routine as a standard part of the Dragon's basic interpreter.

May I point out one small error in the accompanying article, though? EXEC 30594 causes the machine to crash. The machine code begins at location 30597 and therefore you should EXEC 30597 to install the program. Similarly you should CLEAR(MEMORY.TOT), 30587, 30707, 30587. Then upon reloading typing EXEC will install the routine.

S J Jones  
25 Hillingford Avenue  
Great Barr  
Birmingham B43 7NP

## Users USA

THERE IS now a Dragon User Group in the United States. The name of the group is "CHADONET", and currently has a membership of approximately 100 subscriptions. The group is headed by myself and I am currently enlisting the support of Dragon User Groups throughout the world.

DRAGONET will be publishing a monthly newsletter for all of its subscribers as well as other user groups. A national user group was greatly needed here in the US!

We are currently expanding our facilities to incorporate a Users' Bulletin Board System

via telecon, and will be supporting users of CG-8, FLICK, and other features of the Dragon, which has until now been little or none here in the US. Subscription is free, and open to all.

All enquiries should be made to: Dragon Users' Group, c/o Wayne H. Schell, 1511 Louisa Street, New Orleans, LA 70117, USA. Wayne H Schell

## OS9 America

DRAGON USERS running OS9 may be interested in the existence of an American OS9 Users' Group. The address is: OS9 Users' Group, PO Box 7688, Des Moines, Iowa 50322, USA.

Membership costs \$25 per year (but may be more for non-US residents) and for this you get five or more issues of the newsletter, and access to various public domain OS9 software programs of which there are 10 disks currently available, and 35 or more planned for the near future. The group charges \$3 per disk for handling, but again this may be more for postage outside the USA.

Robin Hamilton  
113 Valley Road  
Leighborough  
Leicestershire LE17 3JY

## Convert

I REFER to the "Conversion" program on page 21 of the April issue.

Unless used in the USA, the results of the gatorizations conversion may cause some confusion. When dealing with Imperial gallons, the factor 4.546 will have to be used instead of 3.7854 in lines 760, 770, 843 and 858.

J Jeffries  
18 Highlands Drive  
Malden  
Essex CM9 6BX

## Patch problem

REGRETTABLY, the printers got at the DRAGONCOS

patches in the May 86 issue of *Dragon User*. The following are the corrected values (changes underlined):

Fast 1: - 008F 97

Fast 2: - 001C D0 9D C0,

CF

Problem 3, Patch 3: - 00FF

There was also one error where documentation and patches did not keep pace.

Problem 4: replace line +178D with +1795 D0 E5 12

Only this latter error should have caused a problem, resulting in PRGTEST not operating correctly.

Philip Scott  
4 Badgewood Drive  
Finley  
Cambridge CB10 5LP

## Fantasy Fight

IN REPLY to Mr Vine's plea for help in May's *Dragon User*, I have discovered three useful memory locations which make Fantasy Fight somewhat easier. At even the best games players would have difficulty in entering more than 15 of the 26 screens.

After loading the game normally (press F858F) and POKE SHOOT, LIVES (3-16); POKE SHOOT, WEAPON8 (3-127); POKE SHOOT, START ROOM (3-35) 29 is last room. Then EXEC 24718.

If more than 16 lives are entered then the shots are drawn in program memory area, which could cause crashing. Also, if more than 107 weapons/keys are collected you are left with noise.

## Users and repairers

HAVING JUST read the June issue of your magazine, I would like to express two points raised in your Editorial.

I can only agree that software for the Dragons is becoming hard to find, but I don't think that the loss of a company like Websters, who have studious-

ly sat for a long time, is any great loss to the Dragon scene.

There is still a lot of very good software being produced, even if much of it is available only by mail order, and a few more are leaving the ship doesn't necessarily mean that it is just about to sink completely.

However, the main point that you raise, lack of service and repair facilities for the Dragons, isn't really valid.

We started the Dragon Users Group almost a year ago, with the intention not only of providing a means of communication between Dragon owners, but of providing help with Dragon-related problems, and that most certainly includes repairing such Dragons if we can!

We aren't a commercial Group. Our £7.50 per year membership charge covers only the cost of producing and distributing the monthly copy of "Dragon Update", but we guarantee to do our best to find answers to ANY Dragon problem, and that means hardware as well as software. Having several electronics engineers in the Group, we can carry out most Dragon repairs at local prices (postage I've had three to repair this week alone), and in a lot of cases we can advise members on diagnosis and repair of their own machines. This service is, naturally, restricted to Group Members, it wouldn't be economic to make it a general offer, and in any event, I have no intention of breaching on the toes of those few companies who (try to) make a living out of computer repair work, but we DO exist, and we will continue to do so as long as there is a Dragon owner who needs us.

If anyone is interested in joining the Group, all they need to do is write or phone me for details. Although we started off as a "national" group, we now have members in most European countries and in the States, and members ages range from 11 to 74... we try to cover all possible interests.

# CUMANA

## Special Price offers!

**DOUBLE DENSITY DISK INTERFACE FOR THE DRAGON 32/64**  
 Dragon owners take full advantage of the speed, convenience and reliability of Cumana's 5 1/4" floppy disk drive systems (storage capacities of up to 1.6MB). Cumana are now offering 6 systems which come complete with a double density disk interface for the 32/64.

**SYSTEM OFFER 1:**  
 Double density interface with Cumana's 5 1/4" DS 250 single drive  
 (40 track single sided) **£179.95**

**SYSTEM OFFER 2:**  
 Double density interface with Cumana's 5 1/4" DS 500 single drive  
 (40 track double sided) **£209.95**

**SYSTEM OFFER 3:**  
 Double density interface with Cumana's 5 1/4" DS 1000 single drive  
 (80 track double sided) **£224.95**

**SYSTEM OFFER 4:**  
 Double density interface with Cumana's 5 1/4" DS 500 dual drive  
 (2 x 40 track single sided) **£209.95**

**SYSTEM OFFER 5:**  
 Double density interface with Cumana's 5 1/4" DS 1000 dual drive  
 (2 x 40 track double sided) **£325.95**

**SYSTEM OFFER 6:**  
 Double density interface with Cumana's 5 1/4" DS 2000 dual drive  
 (2 x 80 track double sided) **£354.95**

All the above include Dragon compatible DOS and controller, PSU, instruction guide and all connecting cables.

Other systems available - please ring for full details.  
 Limited offer, all products are subject to availability. All prices are inclusive of VAT.  
 Delivery extra £10.00.

**ORDER FORM (DRAGON 32/64 OFFER)**

## Add-ons and repairs

COMPUSENSE has appointed Race Electronics as its National Service Centre for the Dragon 32, 64 and peripherals.

In addition, CompuSense will be distributing a wide variety of hardware add-ons made by the Welsh company.

Ted Gorychod, CompuSense's managing director, said that Race had been appointed "because they were manufacturing Dragons last year, and they know a lot about them."

Dragon owners who wish to take advantage of the new service should contact Race Electronics direct. There will be a minimum charge of £20.

CompuSense will also be setting up a local repair network, and would like to hear from any companies capable of doing such work.

The new add-ons from Race include an RS232 Interface Unit, a Sideways ROM Cartridge, an EPROM Programmer (all for the Dragon 32), and a Dragon expansion Box System for the Dragon 32 and 64.

Race also manufacture a floppy tape microdrive system, and prototyping cards for the DTV enthusiasts.

The RS232 Interface will allow communication between a Dragon 32 and any other micro which uses the RS232 standard. It also means a 32 can control serial line printers, or connect to compatible modems. It will sell for around £50.

The sideways ROM Cartridge allows the user to hold up to four sets of EPROMs simultaneously in memory, ready for instant access. It will cost around £35.

The EPROM Programmer will allow users to blow their own EPROM chips, at a cost of around £30.

The Expansion box will allow the use of up to four cartridges at the same time. Each cartridge can then be individually selected from the keyboard. It will cost around £180.

The floppy tape microdrive system will give the users for faster access than audio cassettes can provide, at a lower price than disk.

The prototyping cards are available with tin plating at £5 and gold plating at £7. CompuSense will also be selling a Project Case to protect the cards, at £5.

Race Electronics are at Race House, Llanrhyfion Road, Talbot Green, Pontcelyn, Mid Glamorgan CF7 8YF.

The Race floppy tape microdrive

## National user group

THE NATIONAL Dragon Users Group costs £7.50 per year, which includes a monthly news letter covering software and hardware projects, hints and tips, articles and reviews.

Members can also write or phone in with any Dragon problems. Write to Paul Grade, National Dragon Users Group, 6 Navarre Road, Worthing, Sussex.

## Bulletin north east

CoCo 800 is a new Bulletin board designed for CoCo and Dragon users, especially those in the North East of England.

The system runs on a CoCo at present, but a Dragon 64 will be housed in it in the near future. Basic rate is 300/300 cba, with 7 bit even parity, but either 1200/75 or 1200/1200. Basic rates will be added once the B is on line.

There are the usual mes-

sage facilities allowing 2.5K or 10 lines. Users can also upload and download basic programs.

The board goes on line at 9 pm Mondays to Thursdays until 10 am. From 9 pm Fridays it stays open until 1 am Monday mornings.

CoCo 800 can be contacted on 091-265 1964 or write to 180 Rotherburn Road, Heaton, Newcastle on Tyne, NE6 5PP.

## Cotswold comms

COTSWOLD Computers has two new communications packages for the Dragon 32 and 64.

The first is a full feature windows package containing a British Telecom approved modem and a software cartridge.

The cartridge software

allows log on and off and terminal mode. It also lets the user store Printout screens to tape, print the screens, prepare messages on an offline buffer and download software.

The Printed Windows package costs £39 inclusive of VAT and delivery.

The other product from

Cotswold is MODEM, a disk communication package running an OS-9 for the Dragon 64.

A cassette based program is also supplied which gives access to OS-9 disk files from Dragon Basic, and there is a comprehensive manual included. MODEM costs £29.95.

Cotswold Computers is at 6 Middle Row, Chipping Norton, Cotswolds G5 7JH.

## Dragon 128K

COMPUSENSE has taken delivery of a prototype 128K Dragon.

The machine is basically an upgrade from a 64 to a 128K model. The 512K chip used in the Dragon already has facilities for banking other memory, so the upgrade is just a matter of adding extra memory chips and changing the addresses.

Additionally, CompuSense will also be developing an upgrade for the Dragon 32, which will make it a 64K machine.

Apparently, the 32 cannot be given 128K because of the video chip used.

CompuSense's next project will be an onboard disk controller and hard disk interface.

CompuSense is at PO Box 106, 296D Green Lanes, London N13 5EA.

## Adventurer's Club

THE ADVENTURER'S Club is a new organisation aimed at relieving the sufferings of adventurers.

Membership of the club costs £10 per year. This includes 12 issues of the Member's Dossier, a monthly newsletter aimed at keeping readers informed of the latest happening in the adventure world.

The Dossier will also include reviews and tips for adventures. The first issue, 18 pages long, includes the first part of an in-depth study of 80 Diablos for the Dragon 32/64, with a number of very useful hints.

Henry Mueller, the Adventurer's Club Secretary, himself started with a Dragon and says that he has a great deal of fondness for it.

The Club also runs a phone-in adventure help service for members on 01-794 1261.

The Adventurer's Club is at 640 Milestone Road, London NW2 3PH.

# Two more great games from A'N'E.

## CHUCKIE EGG®

Who'd have thought a country farmyard could be so stressful? You must collect the eggs before the nasties get out and eat up all your corn. Watch out for the crazy duck - if she gets out of the cage, you're in real trouble!

## SCREAMING ABDABS

Monsters, screws, scissors and even food will impede your passage through this multi-screen game. Our hero must negotiate his way through the 38-screen screens, collecting the key to the next level on the way. There are numerous traps and monsters to hinder your progress, which include vices, screws, dinks, food, scissors, electric walls, moving platforms, collapsing floors, balls, conveyor belts and many more.

By skillful use of the platform, walkways and the switches you might survive to level 34, then you have the challenge of the penultimate last level - only the experts will make it.

# Dragon adventures

Jason Orbaum takes another trip to the vaults to look at some classic Dragon adventure games

## Pi-manic

**Adventure: Pi-Mania**  
**Supplier: Adventure**

THE ORIGINAL "Pride" adventure, the one that sparked off a series of similar programs with prices, none of which quite came up to the splendour of the Golden Sundry of PI, crafted in gold by Barbara Tippie.

However, if the rival prices didn't quite come up to the standard, the adventures, almost without exception, were about 5,000 per cent better!

PI-Mania has very little internal logic, several random elements, stunningly brief location descriptions, and takes the most amazing length of time to play.

The reason for this time expenditure is that the response is chronically slow, not that the player will spend a long time thinking, as there is really very little to think about that can logically be worked out. The problems seem to rely on trial and error tactics and there is the "PI-Man" (an animated pest) to throw an extra spanner in the works.

After you have worked out the movement system (this is possibly the best puzzle in the adventure) making a move takes a super fast 40 seconds giving one just enough time to fit the cassette into a passing incinerator — a process I heartily recommend! (I exaggerate of course about the time, it's really about 50 seconds.)

Given the superb adventures now available for the Dragon, why you should ever give this one a second look escapes me, unless of course you think you could win that 50,000.

## Wizard

**Adventure: Keys of the Wizard**  
**Supplier: Microdeal**

THIS is an adventure that puzzles me — I know what I have to do, and have almost done it, but haven't had to solve any problems yet!

The game, a real-time action-DSD-type game, is also a pure text adventure of, at first sight, considerable verbosity.

There are two basic aims, and therefore two ways of playing the game; the first is to collect all the treasure in the adventure's domain and take it to the sanctuary, and the second is to kill all of the various inhabitants of the area (except the unicorn who is supposedly friendly) in a bloodthirsty, and noisy, series of battles.

The game talks to you (not very often, and with a very limited vocabulary I must admit) and has several other tricks and traps to keep you awake. The presentation is superb, even allowing you to view information that has recently vanished off the screen.

The parser (that's the bit that turns your English commands into things that the computer understands) is fairly standard (Verblausen, no infocom stuff here), and the response, being in machine code, is nearly immediate.

The adventure, when it was released early in 1984, was the best available for the Dragon. Since its release it has been overshadowed by some incredibly good adventures. This does not mean that it is not an adventure worth

buying; it most certainly is.

To sum up them, not an adventure for the puzzle player, more for those of us who like a colourful jaunt around another land, pausing only to pick up treasures and, of course, massacre the odd creature.

## Franklin

**Adventure: Franklin's Tomb**  
**Supplier: Salamander Software**

ANOTHER classic adventure, this time for the adventures who have got past the beginnings of their craft but are not yet ready to take on the massed forces of a Zork or Snowball (neither of which, unfortunately, look like ever becoming available to the Dragon owner).

This game is the first in a series of three (the equally competent sequels are *Last in Space* and *Fishy Business*) and the adventure is cast in the roll of Dan Diamond, private detective. You have received a note saying "Please come. You're our only hope"

IT IS impossible to review all the other Dragon adventures in the market but here are my own personal ratings for several more. These are, of course, only personal so if you disagree with several of my reviews then these will probably not be of use to you.

The terms used are here explained.

**GENERATION** refers to the type of game along these lines:

1st) Text only (the parser's adventure).

2nd) Arcade adventure (D&D or "Tutankhamun" style).

3rd) Text with pictures (for those with little imagination or descriptive power).

4th) Multi-player adventures.

**PARADE** refers to the complexity of the sentences the game can understand.

**LOGIC** refers to the puzzles and whether they can be considered to be fair.

**PLAYABILITY** is a rating of how much chance the game has of keep-

ing you up until the small hours playing.

**MOOD** is a rating of the pictures on a 2nd or 3rd generation adventure, and the text on a 1st generation.

The **GENERAL** rating is the same as that which would accompany a full review, and, like all the others is out of five.

As a final note, many of these adventures have been available for quite some time now and as such may be difficult to acquire. Also, it should be pointed out that during grading no allowance has been made for age of program.

**Adventure: The Clockwork Resident**

**Supplier: Salamander Software**

Generation:	1st
Parser:	2
Logic:	1
Playability:	3
Mood:	3
General:	2

**Adventure: Last in Space (Franklin II)**

**Supplier: Salamander Software**

Generation:	1st
Parser:	3
Logic:	5
Playability:	4
Mood:	5
General:	5

**Adventure: Fishy Business (Franklin III)**

**Supplier: Salamander Software**

Generation:	1st
Parser:	3
Logic:	4
Playability:	5
Mood:	4
General:	4

**Adventure: The Emperor Must Die**

**Supplier: Phoenix Software**

Generation: M/A (there are two programs, an arcade game and an adventure, the successful completion of one takes you into the other, which is a 1st generation adventure with map on call, all ratings apply to the adventure)

Parser:	1
Logic:	2

# "JUST IMAGINE ...."

Paying only **44p\*** for each of these 9 games

in the latest review April edition Cushman Chronicle

"...I reckon, this one alone is worth the full £3.95..."  
 "...All of the other six programs are as good as the first three  
 I'd say this is indeed outstanding value..."  
 "...Some are actually better than software I've been testing  
 for £100. GREAT VALUE!"

An attraction about **INTERPLANETARY TRADER** has the peril of real time space adventure. Battle with awesome Space Pirates who are after your precious cargo. Navigate meteor and magnetic storms in your quest to become a **GALACTIC BOMBARDIER**. This game costs the full £3.95

An all action story of **PUMPLUS MAMMOR**. Only a crazy person would go near **PUMPLUS MAMMOR**. You have decided to go in! Forged by fierce fantasy imagination you and the **WISPUF** of their features. But it's harder than you thought! You must know about the **TIME BOARS**, or the **ELAKAZER**, **WISPUF**, or the dreaded **MAZE**. Will you succeed? This game costs the full £3.95

The other games are **WILD**, an exciting gambling game, **EXECUTION**, a unique version of a popular word game, **EMPIRE**, an excellent strategy game, **AIR ASSAULT**, an arcade game, **MASS**, **FACE** is very entertaining racing simulation, **WHEEDIT**, a fast reaction order game, **ATOM HUNT** is brain training game of logic.

All games incorporate hi-res colour graphics and sound music. The average length of each game is 25X (total of 225X on one tape). The price of 44p is the average cost per game and refers only to the games on the 8 game cassette. These games are not available separately.

ORDER TODAY and join the several thousand satisfied **DRAGON 32** users. **DATAKOM'S 8 GAME CASSETTE**

with decisions to a graveyard crypt. Suddenly, the ground gives way beneath you, and you are in the tomb. . . .

The actual instructions that come with the game are done in a hilarious Raymond Chandler style, but this prose style is totally different from that used to describe the locations. Instead, the detective theme does not reoccur within the adventure.

But what the game lacks in humor, it more than makes up for in puzzles of varying complexity, from a fairly easy starter, to the brilliance of the gallery.

I found the game a pleasure to play from beginning to end, and, although it was written in Basic, the responses were tolerable, and the screen display excellent (the format used has since been copied on several occasions).

I recommend this game to all but the hardened adventurer, who will find it too easy.

## Doom

Adventure: Caverns of Doom  
Supplier: Microdeal

THIS Microdeal adventure was released at the same time as *Syzygy* (reviewed elsewhere) and although another big adventure (100 different rooms), is not as likely to become a classic.

However, that does not

affect the game's merits and they are considerable. The descriptions are pleasant, not verbose enough for me, and the general mood conjured up is ideal.

Your task is quite simply to escape from an abandoned and crumbling mine complex . . . however, that may be more difficult than it is at first supposed.

The response is fast — the game is in machine code — and the screen layout is absolutely superb (green on black, windowed screen).

Again, Microdeal have had the very good sense to list the commands on the cassette inlay, which saves a lot of time and energy hunting commands.

This is quite simply an excellent first generation (text only) adventure for the average adventurer. The game is selling for a fiver and this is a fiver that could be spent on many worse things than this.

It is available from your local Dragon supplier (if you still have one) or the Microdeal mail order service, which appears to have been designed by Harold Pinter (judging by my experience!).

## Syzygy

Adventure: Syzygy  
Supplier: Microdeal

THIS IS Microdeal's latest

adventure for the Dragon, and my initial impression is to say it's the best third generation (text with graphics) Dragon adventure available, if not the best third generation adventure I've seen for some time.

Stuck aboard the Death-Star, the blurb runs, you have already had one near fatal encounter with Darth Vader and your strength is nearly gone . . . a huge task lies before you as you attempt to destroy the Dark Lord of the Sith and escape the Death-Star.

No trouble with vocabulary — it is all there on the instruction leaflet. It is just a matter of using the right words at the right place.

The game is gigantic; there are 300 locations to explore, and over 250 pictures (as many of the corridors look alike) and the movement from location to location is instantaneous.

The screen (PMODE 4) is set out with an inventory on permanent display, a clear small picture top right and the text input and cursor below all this.

The puzzles have been clearly thought out, the graphics have been excellently designed, and the whole game plays superbly.

It is a great adventure, although admittedly very difficult, and is a pleasure to play. If the Dragon adventurer doesn't own this one then they ought to be ashamed of them-

selves — buy it as once!

## Pulsar

Adventure: Escape from Pulsar 7

Supplier: Channel 8 Software  
THIS IS one of the Brian Howarth mysterious adventure series so often mentioned in the Adventure Trail.

This one has the adventurer on board a spaceship with a lethal alien who has escaped and killed all of the crew save you. All you have to do is escape in the shuttlecraft.

The game is played with text on the lower screen, and the Dragon 64 version produces graphics.

The display is very good except when printing up the location descriptions, at which point it jerks and flashes alarmingly.

The game is well structured and written, with puzzles of good design and increasing complexity, although the descriptions of the locations leave a lot to be desired.

The response is fast, the parser simple but effective and the feel just right, clinical, yet evocative.

Channel 8's entire range has now been taken over by Adventure International — it's good to see they are still available.

# Looking through the Dragon's windows

Brian Cadez with two programs to help you put windows on your Dreamweaver

THE FACILITY to have several "virtual" screens, or windows displayed at once is usually only found on the more expensive computers. The program presented here gives this facility on the Dragon micro. Up to five separate windows can be used at once, and there are several new Basic commands to handle defining and moving the windows. The window facility is not only very useful in programs, but also comes in handy when debugging software. For example, two windows could be set

up, one occupying the top 12 lines, the other the bottom four lines. Listing can be sent to the main window, which editing is done in the parallel one. All windows have independent attributes, which means they have their own cursor position and inverse-normal characters, and all are capable of scrolling independently. Windows can overlap, but this is not generally very useful.

The program is loaded into reserved (fixed) at the top of memory. (The 64Kb) can

It is made to initialize it and from then on all kind of input goes to the "current" window. At startup this is defined as the whole screen, and so will not look any different. To define your own window the WINDOW command is used. It has the following parameters:

```
WINDOW name x2 y1 x1 y0
```

where "*y1*" is the window number (0 to 4), "*x1*" is the left edge screen column; and "*x2*" is the right edge column. The screen columns run from 0 to 31 and the rows from 0 to 15. "*y1*" is the top row of the window, and "*y0*" is the

# What's your best source of information on color computing?

# HOT CoCo

Now you can improve your color computing skills... and it's easy to do. **HOT CoCo** gives you more practical information on the Dragon\* than any other publication. Nearly 150 pages a month!

Every issue is packed with exciting new things for you to do. We won't waste your time with filler stories. You'll get instructive columns:

- Edner's Arcade**—enjoy old-fashioned arcade-style games on your computer
- The Basic Beat**—learn everything you need to program in Basic
- The Educated Guest**—discover how to use your computer as a teaching tool
- Doctor ASCII**—get answers to your technical questions
- Graphically Speaking**—create eye-catching designs that add appeal to your programs

You also get a dozen easy-to-understand articles every month. Games... utilities... programming techniques... tutorials... graphics... education... hardware projects. They'll help you expand what you can do. And complete program listings show you how to use what you learn.

That's not all. **HOT CoCo** saves you money too:

- Candid reviews** help you make every purchase a sound investment.
- Informative ads** let you comparison-shop from home.
- New-product announcements** tell you what's available before it makes the stores.

With all this at your fingertips, your subscription could pay for itself with one wise purchase.

And **HOT CoCo** is mid-free. If you don't like your first issue, just write "cancel" across the invoice and return it to us. You won't owe a thing.

Subscribe to **HOT CoCo** today. Twelve big issues are only \$44.97 (US) (Canada shown on a US basis). Simply fill out the coupon below and return it right now to **HOT CoCo Subscriptions Dept., PO Box 973, Farmingdale, NY 11737, USA.**

# A DRAGON + A DOT MATRIX PRINTER + PRINTER CONTROL

## THE RESULT?

## YOU WILL NEVER TOUCH A TYPEWRITER AGAIN!

PRINTER CONTROL represents a new approach to software - giving the customer what he really wants!

Everything you have ever wanted your printer to do can be done by PRINTER CONTROL: does things you never dreamt it could do!

Correspondence? It's a word processor. Forms? It's a graphics designer. Notices? How big? Footers? With pictures or without? Can't even sign your name? Use the laser-fine-drawn graphics facility and record your signature.

PRINTER CONTROL was written for his own use by an author who couldn't find anything on the market to give him what he really wanted - laser-fine-drawn graphics control of his printer. It has since been described by users as "FANTASTIC!!!!!!"

If you do not agree with this description you have an unconditional money-back guarantee!

-----

PRINTER CONTROL is designed to make text and graphic printing on your dot matrix printer simple and a lot of fun.

The program will operate, with no modifications, on the DRAGON 32, the DRAGON 64 in 32 mode, and the DRAGON 64 in 64 mode. In 64 mode it will give the best printer output.

The program operates in two modes.

### TEXT MODE

In this mode you are able to load, save, verify, merge, edit and print text files. The edit and print facilities allow you to enter printer codes for individual letters, to mix text and graphics characters, to enlarge print up to eight times magnification and to access all the characters of your printer.

You are also able to print all or part of the working screen and magnify it up to 8 times.

Other features include left and right justify, block transfer/delete/copy, automatic address block positioning, automatic taping off block (numbering, centring of headings and page numbers, multiple prints - with a pause per cut sheet, user-defined graphics, user-defined strings, search/report search and variable page and line spacing.

### PICTURE MODE

This allows you to load in a file you have made from the screen of one of your own programs and then change the picture, add text to it, insert all or part of it, duplicate parts of it and to print any or all of it up to eight times magnification either horizontally or vertically. Any picture changed can be saved, verified, loaded or loaded back into your own program.

-----

Comprehensive, user-friendly instruction manual supplied with each tape.

All registered users of PRINTER CONTROL are automatically entitled to a FREE ADVICE AND INFORMATION SERVICE. You have this guarantee. If it is not the best then I do not put my name on it! If you are not satisfied then your money back in full without argument! If you have a problem then I am there to sort it out for you! What more could you ask?

PRINTER CONTROL will cost you £19.99 plus £3.99 a box.

## MacGowan Consultants

18-199 T20030

8, Ardian Drive, Croydon, St. Leonards, Surrey, RG32 1BB

PRINTER CONTROL is a cassette based system which gives 32.7 K words for text files on the DRAGON 32, 368 on the 64. Users with dual system requiring customized versions should contact details of their DOS with their enquiry.

# R & P International

Programs for the Dragon 32/64

## INSTANT GRAPH PLOTTER 1

UP TO SIX GRAPHS DISPLAYED

Instant plots and full on-screen functions and display aids by specially altered graphics font

Graphics font changes are instant at any time

Ready-to-use fonts — adding your own functions too

••• Comprehensive 30-page Manual provided free. First response to request. Over 1000 users

••• R & P will give education programs and modification to any university level of expertise

Free at request

••• Designed to work successfully with... program, plot and run your own data, including the standard screen prompts, and create the user interface... educational value... Dragon 32/64 (Dragon 32/64)

••• Detailed User Program in... •••

••• Instant plotting for your own data

## INSTANT GRAPH PLOTTER 2

An extension of the popular "Instant Graph-Plotter 1" (IGP) with additional features of plot graphics functions for color (displayed in various line numbers, colors, etc.) High resolution

••• Instant plotting for your own data

••• Detailed User Program in... •••

**Datapen**

# A QUALITY LIGHTPEN for the DRAGON 32 microcomputer

**Datapen****£25**

Inclusive of VAX, P&P. Two different drawing programs provided free with each lightpen, "Sketch" and "SHAPE-CREATE". SKETCH is a superb high resolution colour drawing program allowing both precise drawing and freehand sketching, painting etc. SHAPE-CREATE is a high resolution library shape drawing program.

**SUPERIOR PROGRAMS**

- Top class range of your work
- Good documentation
- User routines provided on tape and on a printout

Also available on tape - VIC 20, C64 and  
or BBC B. Please state your micro  
when ordering.

Send cheque or P.O. for £25 to:-  
D.U.F. Datapen Microtechnology Limited,  
Kingsclere Road, Chertsey, Surrey, RG25 3UB

Or send A.I. for details. Now available from good computer shops.

**SUPERIOR PERFORMANCE**

- Instantaneous ambient lighting
- Responds to different colours
- Program accessible LED lamp readout
- Built-in file program control

"It differs from all other lightpens available for the Dragon in that it is a far more sophisticated device... this program package... clearly demonstrates the superiority of the Datapen!"

Popular computing  
Review, Dec. 1981

## DRAGON GAMES USER'S GROUP

### THE BRIGHTEST AND BEST DRAGON USERS' CLUB

**WHY NOT JOIN US NOW AND RECEIVE:**

Our bi-monthly newsletter, DRAGON SOFTWARE, with lots of reviews, playing tips, an open section, details of the latest games, an adventure helpline, etc., etc.

Link-Up — puts you in touch with members in your area. Our own special discount scheme. We offer 15-25% off hundreds of Dragon games — saving you more than the membership fee!

**MEMBERSHIP RATES**

One year's membership is available now for only **£5.00**, whilst a 6 month trial costs a mere **£3.00**.

Please remember to make all cheques payable to 'DRAGON SOFTWARE'.

**OUR CURRENT RANGE INCLUDES:**

Microbot Games	£8.50
Return of the Ring	£7.95
Dragon Chess	£7.95
The Last of the Cricke	£7.95
Zak's son	£9.95
Quadrant	£9.95
Discoed Ball	£7.95
Ice Castles	£6.75
Wings, Mice!	£9.50
Jet Set Willy	£9.50
The Rat Trilogy	£7.95
Cockswain's Incident	£5.50
Junior's Revenge	£2.99
Coltbert Goes Walkabout	£1.99
Coltbert Goes Dipping	£2.99
Chicken Run	£6.50
Quackshot 2	£13.95

FOR MEMBERS ONLY!!

# Dragon database

Ever wanted to put all your vital information — names, addresses, birthdays — on database?

**L'espèce** *Hemibrycon schrammii* Schramm, 1906

DRAGONBASE is a database designed to operate on the DRAGON 32-64 with Oregon data COS attached. The program may easily be adapted to operate with cassette storage by changing the load and save routines and removing the error check and disk editor routines.

On running you will be presented with the MUSE MUI. From this menu you can:

- [1] Load a file
- [2] Construct a file or external one which is in memory.
- [3] View the file which is in memory.
- [4] Save the file which is in memory.
- [5] Construct the titles to the five different fields which make up one record in the database.
- [6] Move to the disk editor which allows you to: Look at the disk directory, initialise a disk, fill a file or Protect a file.

The handling and saving of time is very

**-save** On selecting either [7] or [4] you are requested to enter the name of the file you wish to save or load. These names must be no more than eight characters long (you will not be able to enter more than eight characters) and must contain no spaces or punctuation marks. On entering an invalid file name you will be told of your mistake and the program will return to the main menu.

On selecting [2] you are initially asked to indicate whether you wish to extend or remove all files.

Constructed file

Each file is split up into 200 records, each of which has five fields. Each of the fields is given a name which is defined in [5]. These names all relate to the information stored in the file. For instance:

**TITLE 7 HEALTH**  
**CHAPTER 27. HAZARDOUS**

**Abstract**

[illegible]

1997年12月15日

This file is storing information on people. You would enter the Name of the person under Name, the address of the same person under Address and so on. Once this record of the file is completed you can go on and enter more records or return to the main menu. In the example above the information on 200 different people may be stored. Each person's record has five separate fields of information stored or there making a total of  $200 \times 5 = 1,000$  separate pieces of data in one file, each of which may be seen by 50 characters long.

## Extended title

The extend facility allows you to extend a file, as the name suggests. In the above example, if you were to exit and return to

[illegible]

the main menu in the middle of entering information you could then save the data you have entered and return to it at a later stage to continue entering information.

## View file

There would be no point in entering a load of information if you couldn't get access to it again. The VIEW facility allows you to look at the information you have stored. But that's not all. Once again we will take the name, address, telephone number example we used before.

You must first select which field you wish to search through — the choices are:

- 1 Name
- 2 Address
- 3 Telephone number
- 4 Birthday
- 5 Other information

Let's say we select Name. Now we have to enter the search item. As this is in the name field we should enter a name. The program will now search through all the name fields in all the records until it finds the name you entered. On finding the search item, it, along with the rest of the information on that person, will be displayed on screen (Name, Address, Telephone number, Birthday, Other information).

If the search item occurs more than once (i.e. say, two or more people share the same name) then the records on both or all people with that name that are contained in the file will be displayed. When no more

people with the search item as a name are found the total number of finds will be displayed and the program will return to the view menu. The information displayed may also be printed out (if a printer is connected) or edited.

## Editor

If you select editor mode a black flashing cursor will appear to the top left of the screen. This cursor can be moved up and down with the cursor keys ↑ and ↓. If the ENTER key is pressed while the cursor is flashing then the editor mode will be exited. If any other key is pressed then the information in the field that the cursor is pointing at will be cleared and the substitute information for that field may be entered. On pressing ENTER again the editing of the present field will be terminated and the black flashing cursor will appear at the top left of the screen once more. You can now edit another field or quit the edit mode (press EXIT/END). When you exit the edit mode the view mode will carry on.

## Construct titles

With this facility you are able to give each of the five fields a name. In the above example field 1 is given the name "NAME", field 2 is called "ADDRESS" and so on for fields 3, 4 and 5. The field names are also the title which is displayed on screen. Being able to change the field names allows the

database to be used for all sorts of things from names and addresses to cataloguing books or a record collection.

## Disk editor

The disk editor makes life using the disk drive a lot easier. It allows you, for example, to initialise a disk or kill a file without having to exit the program to use the basic commands.

## Program notes

- 000 Speed up jobs
- 100-200 Main menu
- 300-400 Load file
- 400-500 Construct file
- 600-700 View file
- 1000-1500 Save file
- 1600-1800 File construction
- 1900-2100 Disk editor
- 2200-2300 Display disk directory
- 2300-2400 Initialise disk
- 2400-2500 Kill file
- 2600-2700 File Protection switch
- 2800-2900 Search routine
- 2900-3000 Wait for space bar to be pressed
- 3000-3040 Display error messages
- 3050-3060 Initialise machine code screen invert
- 3080-3100 Input routine
- 3150-3200 Print out information
- 3250-3300 Break key disable
- 3350-3500 Exit routine

# Manic-Miner cheats the official version

*Roy Coates gives the authorized cheat method*

WHEN Manic-Miner was written it was envisaged that many people would give up trying to complete the game owing to some of the more difficult screens such as the warehouses. Because of this a cheat routine was written into the game which may be accessed as follows.

- 1 — Set the game running on the Central Cases.
- 2 — Press the 'F' key to Pause the game.
- 3 — Very quickly press the 'F' key again; this will re-start the game and will be taken as the first letter of the password which is 'PENDING'.
- 4 — Now enter the rest of the password 'ENDING'. If you have been successful a boot will appear at the bottom right hand corner of the screen.
- 5 — At any time whilst you are playing the game you may access the cheat. All you have to do is press the

'BREAK' key. The game will freeze. Now press a key in the range A to V to select your screen.

Please note that there is only one version of Manic-Miner and so this cheat will work on any valid copy of the game. For those of you who wish to make a permanent copy of the game with the cheat enabled and with unlimited lives read on.

Switch your Dragon OFF and then ON again ensuring that any cartridges are removed. Type in the BASIC program given below, carefully checking that the DATA statements are entered correctly. RUN the program and when prompted to press the ENTER key place a blank tape in your cassette player; press the ENTER key and the machine code routine held in the DATA statements will be saved to tape.

Again switch your Dragon OFF and then ON again; place your Manic-Miner tape in

the cassette recorder and load the game with the command

**LOADM"" 2000**

When this has loaded type in the following **POKEs**.

**POKE 5H0B0,5H00  
POKE 5H5140,5H5A  
POKE 5H48EF,5H20**

These **POKEs** will enable the cheat routine and give unlimited lives. **LOADM** the program that was saved from above, place a blank tape in your cassette recorder and when ready to record type

**BASIC 5H000**

A new version of Manic-Miner will now be saved to tape and may be loaded in the same way as the original.

Finally, my thanks to all the people who have written to me regarding Manic-Miner and Jarlief Nils; your letters are very much appreciated.

```
10 FOR A = 5H000 TO 5H032 : READ B# : POKE A,VAL ("5H"+B#)
20 NEXT A
30 INPUT "Press ENTER when ready to save..." ;#
40 CBAYEN "SAVE",5H000,5H032,5H000
50 DATA 0E,0A,3A,10,0E,01,02,AA,00,37,04,A7,02,28,F0,0E,01
60 DATA 5B,0F,01,E7,0E,09,38,34,18,0E,7D,0F,34,18,0E,0E,00
70 DATA 0F,01,03,34,10,7E,99,18,4D,49,4E,45,32,32,28,20,00
```

## Address specific loading

*another Roy Coates routine — how to put machine code programs just where you want them*

THE ABILITY of the Dragon to load machine code programs into memory at an address specified by the user is obviously a very useful one. Unfortunately, saving a portion of the Dragon's memory so that it appears on the tape as having a different load address has always been a bit of a problem. The machine code routine given here does just that. The routine gives a relocatable so that those using it without an assembler may choose any memory location as the origin for poking in the Opcodes here. This makes the taping very useful indeed.

The example shown here saves memory from \$2000 to \$3000 to tape but changes the tape descriptor block so that when re-loaded the code will load at \$1000 with an \$003C address of \$1100 where 'start' and 'end' are the start and end addresses you wish the final tape copy to have, and 'start' and 'end' are the start and end addresses of the actual code in

# PRESTEL FOR YOUR DRAGON 32 AND 64

AT LAST A LOW COST, FULL FEATURE VIEWDATA PACKAGE FOR YOUR DRAGON  
1200/75 OPERATION MEANS LOCAL RATE PHONE CALLS, GRAPHICS AND TEXT  
SCREEN DISPLAY

## CARTRIDGE SOFTWARE FEATURES INCLUDE:

- ★ LOG ON AND OFF ★ TERMINAL MODE ★
- ★ SAVE PRESTEL SCREEN TO TAPE ★ RELOAD AND DISPLAY SAVED SCREEN ★
- ★ PRINT SCREEN-GRAPHICS & TEXT ★ PREPARE MESSAGE (OFF-LINE BUFFER) ★
- ★ DOWNLOAD SOFTWARE ★

THE MODEM SUPPLIED IS TOP QUALITY, BT APPROVED, 1200/75 AND 1200/1200 AND MAINS  
POWERED. ALL CABLES AND MANUAL PROVIDED.

## SOME SERVICES AVAILABLE VIA PRESTEL INCLUDE:

HOME BANKING (REAL TIME SECURITY) • HOME SHOPPING (LITTLEWOODS ETC) • HOME BETTING • HOME CONVEYANCING  
CIT SERVICE (STOCK EXCHANGE ETC) • EDUCATION & D U • FARMLINK • MEDTEL • TELER • ELECTRONIC MAIL  
TH. ATMS • TV • TRAVEL BOOKINGS — FERRIES, AIR, BRITISH RAIL, COACH • CAR HIRE • MANY MANY MORE.

AT ONLY 295 INC VAT AND DELIVERY — CAN YOU AFFORD NOT TO!

SEND CHEQUE, POSTAL ORDER OR ACCESS TO

## COTSWOLD COMPUTERS

Tel: 0505 41232

# of the hill!

The **KONIG** is the biggest and best magazine available for the TRS-80 Color, TDP-105, MC-15 and Dragon-32 Computers.

And no wonder! It's over 300 pages thick each month... pages brimming with programs, product reviews, tutorials, columns, hints and tips about your computer. Yes, it is considered "the" Color Computer magazine to buy.

Don't delay. For only \$29 you can get the **KONIG** every month of the year. Then your CoCo will be King of the Hill too!

U.K. Subscription rates:  
U.S. \$65 surface rate  
U.S. \$100 air rate

the **KONIG** is published by  
PUBLISHERS

VHS: Sign up for a year (12 issues) of the **KONIG**

Subscription to **KONIG** is \$29 a year in the United States. Outside the United States, \$65 a year surface rate or \$100 a year air rate. Add \$5.00 for each extra year. Payment in full must be made. Payment will be collected when the subscription is renewed. Payment in full must be made when the subscription is renewed.

# Greater than— or less than?

Rob Lee provides some educational interest for Dragon users with children

UNDERSTANDING the ideas of "greater than" and "less than" may come as second nature to Dragon users, but to children it is a concept which has to be learnt. In school, the idea is often introduced by small group discussion of more than, bigger than, thinner than, younger than, etc. and then switching to using "greater than" in number conversations. Formal exercises of this sort often end the day.

8+4 □ 2+6  
10-3 □ 4-10

Using the computer, however, gives us the opportunity to generate further into children's thinking, for we can create the situation:

□ + □ > □ + □

and ask children to feed numbers into the boxes and test the validity of the resultant statement.

The following program is both a handy game and a teacher. The numbers to be put into the boxes are randomly generated and the players decide which box to put them in.

Numbers chosen by the die-throw (taking on the screen for a time proportional to the degree of difficulty chosen). Hence younger children can influence the number they get by being quick on the keyboard, while those choosing faster options cannot. The type of statement (one of eight) you have to satisfy also alters with this choice. Obviously:

A + B > C > D

YOUR TURN ROBERT LEE

MAKE THIS STATEMENT TRUE

BOX A	BOX B	BOX C	BOX D
+	?	<	?
		?	+

DIE ROLLING 1 2 3 4 5 6 7 8 9

↑

IN WHICH BOX SHALL I PUT 3 ?

RUNNING TOTALS

ROBERT LEE 4 ANN HARRIS 6

is easier than:

A - B < C < D

The points awarded to players who succeed in making the statement but vary with the play. In the easier statement, a winner would get the value in box C. In the second case, box A. So, some degree of tactics can help you and additional motivation is added by this variability.

The game is thereby made fun and has a 'come again' factor; it is not just a 'test'.

or 'quiz' however. At the end of a player's turn, the statement is false and he cannot see why, then, a moving screen display does the appropriate substitutions to demonstrate the error.

#### Program Notes:

10-120 The sequence  
10-24 Input routine  
20-45 Set up screen  
60-84 Die-throw & test sequence  
100-140 Input routine (screen buffer)  
140-450 Instructions & data lines ■

**THREE** FOR the price of one, this month, with the arrival of *The Ket Trilogy* from Edgecraft at the reasonable price of \$9.95. This made its debut at the second 6000 Show, and some of you may have seen it there, and perhaps even bought it. For those who couldn't make the show, though, it's worth a fairly lengthy look. While at the show, incidentally, I was told by Microdeal that they have three Dragon adventures in the pipeline, so good luck to them and others who continue to be adventurous, while some drop out of the market.

### Three for one

Back to *Ket*, which comes in just one cassette, the first side containing *Mountains of Ket* and *Temple of Ket*, side two having *The Final Mission*. The adventures can all be played independently, so you can be working on all three at once, with success at each one revealing a part of a message for you. Throughout all the three you'll be accompanied by Edgar, a magic assassin (bug who has been placed on your neck with orders to sink his poisoned fangs into you if you try to chicken out along the way. Fortunately this doesn't interfere with the SAVE routine. Aside from Edgar, what the adventures have in common is that they use all three text-only, accepting most of the usual commands, generally in two-word form.

Each of the adventures also incorporates combat sequences, and while I don't normally care for this kind of intrusion, involving as it does an element of luck, at least here the sequences are brief and quite humorously done. You'll find you can fight all manner of creatures, humans and semi-humans: elephants, horses, warts, if they're in there, you can probably fight them, though it's frequently not a wise move.

The reason you have a creature called Edgar perched near your jugular vein is that you were recently sentenced to death for murder — though this was naturally a frame-up, you being an honest and intrepid adventurer. On the eve of your planned execution you were given a Do-or-Die option, and naturally you chose to Do, presumably on the grounds that an adventure where you choose to Die at the start would have limited appeal. Although you've been temporarily spared, no one's taking any chances, hence you have Edgar hovering at your throat.

The deed you have to do is try to bring peace to the lands of Ket, which are threatened by a group of mad monks living beyond the Mountains of Ket to the east of the village where you begin. A character called Vran is the leader of the monks, aided by the High Priestess, Delphia. Your overall task is to sort the two of them out, naughty people that they are.

THREE GREAT ADVENTURE PROGRAMS COMBINED TO CREATE THE CLASSIC KET TRILOGY

*Mountains of Ket* simply requires you to go to the far side of the Mountain alive, and as soon as I'd loaded this up the first thing I did was CLIMB. This wasn't sheer overcautious, but sheer common sense. When you begin you're randomly allocated points for Prowess, Energy and Luck, and I thought I could do better than my initial 8, 21 and 9 points, so I CLIMB and CLIMB till I got a reasonable respectable 9, 22 and 12 points. Then a quick INVENTORY showed I was carrying some coins and the good old trusty sword, which is better than a rusty sword, I suppose. COUNT COINS showed that I had just two. I was on a road with fields either side and the village to the east.

### Mountains

Making my way to a stable I tried to buy a horse from the stableman, but he wouldn't let it go for less than four coins so I obviously had to increase my wealth somehow. (Being kind to someone pro-

vided me with more coins and a map, and I was able to return to a hardware shop which did a nice line in lamps. Not so nice were the phantas which prevented the swimming the river, and I wish the cartographer would let me pass to have a look round upstairs in his coach house, but he won't. Not yet, anyway.

Temple of Ket takes you beyond the Mountains of Ket and has you going further eastwards with the hope of finding the Temple and bringing about the demise of Delphia. You begin this one in a passage, and if you think you can simply nip back from the second adventure to solve the first one retrospectively, I'm afraid the passage is blocked by a boulder, put there by the final guardian, a Zombie. Your way forward is blocked by a river, but it should take you all of about 10 seconds to figure out how to cross it — I wish all the problems were so easy. On second thoughts, no I don't, as it wouldn't be much of an adventure then.

### Temple

The locations and objects here are rather strange, as you wander through a wilderness and suddenly meet up with an elephant, while further along is a sleeping kitten and a small hampline. Hardly the most realistic of stories, but at least it sets you some unusual problems. Your way north is barred by some questing, and east by a tall edge over which dangles a rope. Sadly the rope is fixed to something at the bottom of the cliff, not the top, so climbing down is not recommended. Nor can you pull the rope up. The place is populated by little people called warts, and my first encounter with one of these was when I had a flask of acid thrown over me. Fortunately I'd already taken preventive action, even if I hadn't realised what I was doing. Beyond here lies a door, which is difficult to open, but once through there you find yourself in a large room, at which is a wart kitchen, where no washing up has been done for years. Down some stairs is a ruby and a skeleton, with the skeleton somehow managing to block my way west, while upstairs there are lots of warts who insist on engaging you in combat. You can always run away, after the initial attack, but even so they somehow manage to get in a final blow as you go, and these slowly whittle away at your energy points.

Having been wanted to death several

times I read *The Final Mission*, in which you confront the evil Viper himself, though your first task is to get out of the prison cell where you find yourself, with just a chair for company. Pretty easy, but then you find yourself in another cell with nothing more exciting than a lot of straw in the corner. The way out of here turned a little unlikely, though you're sure to hit on it with the limited objects at your disposal. No sooner was I out of this cell though than I came face to face with something called the *Ein Monster*, and that polished me off with no trouble.

Though I wouldn't say *The Kai Trilogy* was the best set of adventures I'd ever seen, it's certainly recommended as giving good value for money and problems enough to keep you going for ages. When originally published on the Spectrum, a prize of a video recorder was being offered to the first to solve all three titles, and although that's now been claimed you can take some comfort in knowing that it wasn't won for some considerable time after the adventures appeared.

Less room for letters this month, but here are a few tips and pleas. Simon Head of Whitehaven asked me for general help on *Sea Quest*, and also wanted to know how to open the trapdoor in the beach hut. General help is virtually impossible to give, unless you know exactly where a person is stuck and how far they've explored the adventure, so always try to ask fairly specific questions. The answer to Simon's specific question (written backwards) is that: **ISAM REMEH TRACOF YEKZ HTDE ISMU Y**.

Joy Birley of Eryl Don, Mona Terrace, Gloucestershire is stuck in *Franklin's Tower*, unable to find a coin to use in the jake tube and unable to get out of the pulley room and obtaining the Copper Star. If you can offer Joy any joy on those, let her know.

Roll Michelson of Segrise, age 33, 7700 Stanger, Norway, kindly says thanks "for an excellent page in an excellent magazine. Continue like this!" Well we'll all try to, Roll. He's completely stuck, he says, in *Return of the Ring*, and listed four questions: how to get the amulet from the frog; where to find the transportal eight miles into the forest; how to escape from the monsters in the forest; and how to use the rings to get some useful results. I've answered Roll on some of those, which are a little lengthy to print backwards, but if you too can offer advice on those problems then do write to him in Norway.

Some of you may know the name of Neil Scrimgeour, who runs the ASDI column of the National Dragon User Group, and Neil

writes to recommend a few Tandy adventures for anyone with the Dragon's sister machine. He says *Pyramid 2000* is good, being a Tandy implementation of the original *Colossal Cave*, while he also rates *Reavers and Devils*, even if he is unable to get past the guard dog in the latter. Help to Neil at 125 Occupation Road, Gorty, Northants NN17 1DG.

Finally, to show that some people do actually read the column, a letter from Femmes, whose adventure *The Trial of Arnold Blackwood* I reviewed some months ago. It's a good adventure, but I complained that it didn't have a SAVE routine. Programmer Colin Harris has now incorporated this, and sent a new version to prove it, mentioning that copies are now also available from Touchmaster. If he sells a few more he may set about converting more Arnold adventures for the Dragon, so over to you, dear readers. In fact, it's over and out.

# GO SUB DRAGON USER

(Don't lose out — make sure you receive the next twelve issues of your favourite microcomputer magazine by sending away for a year (or two years) subscription today.)

Just complete this special subscription order form now, and send it with your cheque or postal order to our subscription department.

And if you subscribe for **two years**, you can claim a **free book**. Choose from any one of these superb Sunshine microcomputer books — *The Working Dragon 32*, *Dragon 32 Games Master*, *The Dragon Trainer*, *Advanced Sound and Graphics for the Dragon computer*, or *Artificial Intelligence on the Dragon computer*.

If you've got a technical question write to Brian Cade. Please do not send a SASE as Brian cannot guarantee to answer individual inquiries.

## Dragon Answers

### Alldream

**COULD YOU** possibly tell me how to change Alldream cassette to allow saving and loading text files to and from Dragon disk instead of cassette.

Ian Ferguson  
10 Woodhall Road  
Luton

IT IS not possible to change the Dream programs to save to disk rather than cassette directly. However, one method is to have a Basic program running which calls DREAM and also handles commands such as SAVE and LOAD. The start address of a Dream text file can be found by 51+PDSX (27641)+250-PDSX (27643), assuming that Dream is loaded at its default address.

The text file is then saved by SAVE "filename", 51+PDSX, 37776. The file can simply be loaded by LOAD "filename", as the values were saved with the file these will be restored automatically on loading.

### On the edge!

I HAVE recently purchased the Electromechanical Technology interface, and have obtained a circuit diagram from Dr Mark Varney to allow simultaneous use of Dragon DGS with the interface.

The address decoding circuit is quite straight forward, but I cannot obtain edge connectors of the type in the Dragon cartridge port (2 = 39).

Can you give me the address of a supplier as I have listed numerous ones?

Mark Main  
53 Grompton Road  
Abandon

YOU CAN obtain 2 x 32 way edge connectors from your local Tandy store, or Magline to name but two. These can be trimmed down to 2 x 39 way if required. The Tandy catalogue number is 276-5551, and the Magline catalogue number is PE227. Magline can be contacted on 0782 554155. Both should cost less than £3.

### CoCo

**COULD YOU** please let me know what changes are required to run

the two following programs on the TMS CoCo:

- 1 Autorun (July 1984 issue)
- 2 Snake Key Quixote (October 1984 issue)

I would be most grateful as I have watched everywhere in vain.

David Pheas  
4 Pine Street  
Parnworth  
Belted SL4 3PB

THESE are one of a number of letters from Tandy owners asking about the Autorun listing. The only reason these routines will not work on a Tandy machine is that the ROM routines used are at different addresses. A version of the first key disable routine for the CoCo is listed below.

The ROM calls you will need to change in the AUTORUN listing are as follows:

Dragon	Tandy
23864	44702
45767	42960
33649	44547
39180	35587
45884	42967
33623	44031
33733	44271
33651	44045

### Autorune

WHEN I was working on a program for writing music script I found a very strange bug in my Dragon. I had set my Selskista GP-1004 in graphic mode, and intended to use a dual sound to warn of "line full". However, when the Printer was to Print the notes, it started with a long graphic string of CHR\$(255). After a lot of frustration I finally managed to find that two consecutive sound commands somehow fed a string of characters to the Printer.

NO "N-Z CHR\$(255)

20 GOSUB 2000,1  
30 GOSUB 2000,1  
40 "N-Z"

should just produce a line feed in line 40, but instead there is this strange string.

Could you explain this?

With kind greetings from a Dragon's lair in Sweden.

Åke Lindgren  
Björkholm  
Sweden

THE PROBLEM you have found is indeed a bug in the Dragon 32's ROM which was cleared up in the 34's ROM. The problem comes because the Keyboard and Printer share the same output PIA port, and the Printer Status line is part of the same address as the I/O converter used for generating sound. The bug is in the sound generation routines which occasionally stroke the printer line, which

results in the Keyboard data going out to the Printer!

You can best avoid the problem by avoiding the use of CHR\$(255) and by keeping your hands off the keys whilst the program is running.

### Define

I AM currently in the process of writing a program, in machine code, for the Dragon 32. In this program I need to define my own BASIC words. My only problem is how to convert variables and constants used by the words, into machine equivalents.

I would be grateful if you could tell me how to do this without producing "syntax" and "function call" errors.

Simon Joyce  
47 King Street  
Bradley  
Bristol  
West Midlands

THE FOLLOWING ROM routines can be used in your own command handlers for accessing numeric variables:

JSR 35433 returns the value of the following variable as an 8 bit number in the 'X' register.

JSR 35482 returns the value of the following variable as a 16 bit number in the 'X' register.

If either value is out of range, is greater than 255 in the first case and greater than 65535 in the second case then a PG error is automatically produced.

## Screen dumps

A NUMBER of letters have come in regarding problems with screen dumps.

The commonest problem is unexpected characters appearing in the middle of the screen dump, or unwanted blank lines appearing. These problems are all caused by the Dragon's printer routine. This has the annoying habit of inserting an extra 'space' character if it thinks the printer is at the start of a line when a carriage return code is to be printed.

The solution to the problem depends upon how the original screen dump program was written. For basic programs, add the command PONE 158,16 immediately before any PG-2 commands. This will also have the effect of disabling the auto-LF feature, so you should set the dip switches in your printer so that a LF is not required.

For machine code screen dumps change any calls to the printer routine at 08410 (JSP 08470) to a call to the routine at 08373 (JSP 08373). This latter routine simply outputs the character in the A register directly to the printer without interspersing newlines and CR characters.

Finally, you can also try typing PONE 65535, PONE 65535; AND 254 before using the screen dump program, this will disable interrupts and prevent 'extra' characters being printed.

# Palindromic number puzzles

Gordon Lee sets the challenge — Design Design provide the prizes

PALINDROMIC numbers can provide quite a few surprises! These, as might be expected, are numbers which read the same forwards as backwards. Here are a few examples: 121, 14641, 43834, 44944, 1234321 and 4308034.

You may have noticed that as well as being palindromic, these numbers are also perfect squares. Even more curiously, their square roots are also palindromic. In fact, research shows that there is an infinite number of palindromic squares and many of these appear to have roots which are also palindromic.

It is not difficult to program a computer to print out a list of palindromic squares, and if this is done it will be seen that the majority have an odd number of digits. Amongst the lower orders of squares there are just two with an even number, 694,694 which is the square of 834, and 637,832,238,736 — the square of 798,644. One particularly unusual palindromic square is 1111111111 — 1034657867654321.

## Curious cubes

If palindromic squares are curious, then palindromic cubes are even more so. In general, every cube that is palindromic will have a palindromic cube root. (Note that this is not the same as saying that the cube of a palindromic will be palindromic). Every cube so far tested seems to obey this rule with just one exception!

Quite why this should be has not yet been demonstrated, nor does any proof exist that there is a second exception to this rule, but all cubes under  $2.8 \times 10^{11}$  have been tested by computer and all but one agree with the rule. I will not give this exception here as readers might enjoy solving this problem for themselves. Although it is not a particularly high number, its computation is slightly beyond the normal mathematical functions of the 'Ori-

gon' and so a slightly more sophisticated approach is required.

Just as there are an infinite number of palindromic squares, so too are there an infinity of palindromic primes. Every palindromic prime must have an odd number of digits, with just one exception — the two-digit prime 11.

Number theorists will very soon realise that all palindromes with an even number of digits must automatically be exactly divisible by 11, and therefore — except for 11 itself — cannot be prime. Of particular interest are the four numbers 13631, 14741, 15951, and 19091. Apart from these all being palindromic primes, they have a common difference of 810.

## Rep-units

Also of interest are the so-called rep-unit primes. These are numbers consisting of the single digit '1', and so are palindromic in a rather special way. Apart from 11, the only other known primes of this type were, for many years, 11111111111111111 and 1111111111111111111. More recently the number consisting of 317 ones has also been shown to be prime!

There is one particular problem relating to palindromic numbers which has been of interest to mathematicians for many years. The advent of high-speed computers has enabled the problem to be attacked forthrightly, but the problem's enigmatic nature still remains.

Take any positive integer, write down its digits in reverse order and add the two numbers together. Take this new total and repeat the procedure until the total becomes palindromic. For example, the starting number 126 becomes palindromic in just two steps:

```
126
  621
---
 747
 747
---
```

```
10 CLAR: SQR:=10
20 FOR P=1 TO 100
30 S4="":CARRY=0
40 FOR Q=LEN(S4) TO 1 STEP-1
50 A=VAL(S4(Q),P)
60 S4=S4+CHR$(A)
70 IF .AND THEN CARRY=INT(.1+((A+CARRY)/10)) ELSE CARRY=0
80 S4=S4+(A+9-CARRY*10)/10:LEN(S4)=LEN(S4)+1
90 NEXT P
100 IF CARRY=0 THEN S4=STR$(CARRY)+S4+RIGHT$(S4,LEN(S4)-1)+100
110 S4=S4/100:PRINT S4:GOTO 20
```

This program should have appeared in June's competition page

The theory is that all numbers should eventually become palindromic, but this is far from proved. Of the first ten thousand integers tested by computer, all but 248 of them have formed palindromes in under 25 steps. Of these, the longest palindrome is 16,666,468,468,661 formed after 20 steps from the starting value 8999 and 7998 (or their reversals).

## Small exception

The smallest number that does not form a palindrome is 196, and this has been computed beyond many thousands of steps without obligingly forming a palindrome. This month's competition involves this value, 196. If this number is taken as described to the three hundred step, somewhere along the number so formed at that stage will be the sequence of nine digits: 44-----45. Can you fill in the missing five digits?

Of course, you will have to work out the rest of the number too!

## Prize

THIS MONTH'S prize is 20 copies of Design Design's arcade game *Rommel's Revenge* — possibly the best implementation of *Battlezone* on any micro.

## Rules

To win a copy of Design Design's *Rommel's Revenge*, you must both show the answer to the competition and how to solve it with the use of a Basic program written on your Dragon. Please do not send in a cassette containing your answer.

As a disclaimer, complete the following sentence in 12 words or less: "I want to take on Rommel because ..."

Your entry must reach Dragon User by the last working day in July. The winners will be announced in the October issue.

## April Winners

Four perspicacious Dragon User readers managed to win themselves Dragon 64s donated by Compuques. They are Christine Richmond of Preston, J. Bowen of Rugeley, G. Hamilton of Stalybridge and N. Gosling of Alveston. They will be receiving written confirmation soon.

# RETURN OF THE RING

THE RING  
OF  
DARKNESS  
PART II

At last the saga  
continues...

The Guardian of Shodir is defeated, the Hall spawned hordes of the Evil Sage lie at bay. Now Ringwraiths, wielders of the Four Bright Rings, must face the greatest challenge to return the Ring Of Darkness to its creators on the hidden planet Ringworld... And somewhere at the ends of time the forces of evil are preparing their revenge.

After one year of development, Wintertime are proud to present the most sophisticated game ever created for the Dragon 32. Written 100% in machine code, RETURN OF THE RING is an outstanding multi program blend of superb high resolution colour graphics and advanced routines that allow you to communicate with your computer in complete sentences. You will face challenge and excitement as you and your Ringworld companions travel a mysterious planet and brave the dangers of an amazing three-dimensional forest moon. An epic adventure unrivalled for its wealth of detail and diversity.

May luck travel your path.

Please note: RETURN OF THE RING is a complete adventure. You need not buy THE RING OF DARKNESS to play it.

# St. George now has two choices!

Red or green will slay the Dragon

- ▲ Nylon encased-Steel shafted joystick with ball and socket joint.
- ▲ Fast spring return to centre.
- ▲ Graphite wiper linear potentiometers.
- ▲ 12 Months Guarantee.
- ▲ 7 day Money back Guarantee.

## Complete control at your fingertips

The smooth control of the Voltmace-delta spring return joystick is now available to Dragon owners. Each joystick has been individually tested before it leaves our factory, following extensive robot testing to prove the design (not revised in more than a million times). This means that not only will your joystick be strong, tough and reliable, but it ensures long life, accurate control and with the choice of red or green fire buttons, gives instant recognition between the left and right joysticks.

If you are not completely satisfied with the delta 3d, return it to us within seven days for a full refund.

Dragon dealers come out of your control.  
More stockists required in some areas.
