TOUCHMASTER is a revolutionary concept in computer peripherals — a touch sensitive pad which plugs simply into the computer and effectively bypasses the keyboard.

Of sturdy design, with an A4 work surface and superb 256 x 256 resolution, the TOUCHMASTER package provides all you need to get 'hands-on' experience without even fitting a plug! The unique technology used means that there are no switches to break, making TOUCHMASTER a robust and reliable machine.

Included in the package are the TOUCHMASTER, transformer, user guides, Multipaint programme & overlay, and a stylus (just in case you don't want to use your finger!). With the multipaint program you can quickly and easily draw on the overlay provided, with stylus or finger, in a resolution of your choice, and the drawing will be reproduced on the screen immediately. Not too sure of your free-hand drawing capabilities? Not to worry, Multipaint also provides functions to produce boxes, circles, triangles etc.

The finished drawing can easily be saved to tape, or disk if required as the interface still lets you use your drives.

Graphics are just one aspect of the TOUCHMASTER and there is a range of software — TOUCHWARE — available. Young children unable to recognise letters on a keyboard are not prevented from using TOUCHMASTER and there are a number of colour and shape recognition packages available for them. They can benefit from matching shapes and colours on the overlays provided with the TOUCHWARE range to those which appear on the screen simply at a touch.

It is easy to write programs for the TOUCHMASTER — if you can cope with joystick input you can handle the TOUCHMASTER input. A sample program is given in the user guide showing just how easy it is to include the TOUCHMASTER and its many possibilities in your programs.

TOUCHMASTER is available now from Touchmaster Ltd for the price of £149.95 — you just use the standard order form overleaf.

Also available for the BBC, CBM64, VIC20, SPECTRUM

Further details available from Touchmaster Customer Services.
